THE INDEPENDENT TELEPHONE INDUSTRY

The Interstate Telegraph Company is an independent Telephone Company and a member of the California Independent Telephone Association.

There are some 6,400 Independent Telephone Companies in the United States owning and operating about 12,000 exchanges. Bell System Companies operate about 6,200 exchanges or about one-half the number operated by Independent Companies, but the Bell Companies

operate in all of the largest cities.

Independent telephone exchanges have over 5,000,000 telephones in service—approximately one out of every five telephones in the United States.

Independent exchanges are interconnected with other Independent and Bell exchanges and with the Bell System's network of long distance lines to furnish telephone service practically throughout the world.

HOW TO USE THE TELEPHONE

OBTAIN TELEPHONE NUMBER FROM DIRECTORY

Please obtain the desired number from the latest issue of the telephone directory. If the listing is not found call "Information."

TO PLACE A CALL

Lift the receiver and listen for dial tone before dialing. Dial tone is a steady humming tone. Upon receiving the dial tone hold the receiver in the hand and dial the number as listed in the directory.

After placing a call, listen for the ringing signal, busy signal, or report from the operator. Please do not abandon the call until you have given the called party sufficient time in which to answer.

The ringing signal is a "burring" sound heard at regular intervals. The busy signal is a steady "buzz-buzz-buzz" sound, indicating that the called line is in use. Some Central Offices are not equipped for giving these signals, but in such cases the operator will give a report if the called party does not answer within a reasonable interval, or if the called line is busy.

TO CALL ANOTHER TELEPHONE ON YOUR LINE

At Barstow, Big Bear Lake, Bishop, Boron, Bridgeport, Edgewood, Independence, Inyokern, Leevining, Lone Pine, Randsburg, Running Springs, Trona and Victorville, dial "9", then the last figure of your number, then the last figure of the number desired, and replace your receiver.

For example—If your number is 5321 and the number you wish to call is 5322, dial "9", then "1", the last figure of your number, then "2", the last figure of the

number desired and replace the receiver. The bells of both stations will ring. When the other party answers, the bells will cease ringing. If the other party does not answer within a reasonable time, remove the receiver to stop the ringing and call again at a later time.

At Big Pine and Pine Creek, dial "91", then the last figure of your number, then the last figure of the number desired, and replace the receiver. The bells of both stations will ring. When the other party answers, the bells will cease ringing. If the other party does not answer within a reasonable time, remove the receiver to stop the ringing and call again at a later time.

AT ALPINE AND COLEVILLE

After dialing the number in the regular manner, the busy signal will be heard. Replace the receiver on the telephone. In a few seconds the ringing code of the number you have called will be heard on the line at regular intervals. When the called party has answered the bells will stop ringing. At this time, remove the receiver from your telephone and begin your conversation. If the called party does not answer within a reasonable time, remove your receiver momentarily to stop the ringing, and call again at a later time.

If the busy tone is heard in your receiver before you have dialed any number, it is an indication that all of the automatic equipment in the telephone office is busy. Replace your receiver on the telephone and wait a reasonable time before attempting to place your call again.

AT GARDNERVILLE

Call Operator.

WHAT IS AN EXTENSION TELEPHONE?

An extension telephone is an extra telephone instrument attached to your present line. It can be placed anywhere in your house or place of business.

Since telephone instruments are again plentiful, we are happy to announce that **EXTENSION TELEPHONE SERVICE IS AGAIN AVAILABLE.**

Extension service will not delay new service for anyone on our waiting list. The only new equipment required is this extra telephone instrument. Thus, the use of plentiful telephone instruments in no way interferes with our expansion program, which calls for installation of other equipment still scarce.

Investigate low-cost, high-convenience extension telephone service, now available for most of this community.

**WHAT IS AN
EXTENSION TELEPHONE?**An extension telephone is an extra telephone instrument attached to
your present line. It can be placed anywhere in your house or place
of business.Since telephone instruments are again plentiful, we are happy to
announce that **EXTENSION TELEPHONE SERVICE IS AGAIN
AVAILABLE.**Extension service will not delay new service for anyone on our
waiting list. The only new equipment required is this extra telephone
instrument. Thus, the use of plentiful telephone instruments in no
way interferes with our expansion program, which calls for installation
of other equipment still scarce.Investigate low-cost, high-convenience extension telephone
service, now available for most of this community.**Interstate Telegraph Co.**
